

## What we do

**AdvanEdge Solutions (AES)** is a full-service technology consulting company, focused on the technology needs and challenges of schools and businesses. We design complete robust, intricate and adaptable infrastructures which assist customers to resolve their simple to complex technology challenges. Our solution sets focus on identifying, strategizing, and orchestrating best-practice solutions paths which provide the best benefit to the client.

*Here's a list of solutions we have successfully provided/implemented:*

- ◆ Auditing and Support Services
- ◆ Business Continuity and Disaster Recovery Strategies
- ◆ Data Center Planning & Design
- ◆ E-Learning Assessments
- ◆ E-Rate Application and Strategies
- ◆ IT Leadership
- ◆ Network & Server Infrastructure Planning & Design
- ◆ Telephone and VoIP Planning & Design
- ◆ Wireless Network Planning & Design

**AES** has successfully designed and implemented complex to simplex strategic technology solutions for clients of all shapes and sizes. You can be assured your needs will be meticulously addressed to provide you the most cost-effective sustainable solution which makes the best sense for you and your organization.

*We specialize in providing E-Rate Application and Strategy Support:*

**AES** is focused on helping our clients to maximize their funding potential through the Federal E-Rate program. We have been extremely successful in securing funding for schools across the USA. We started with one client over 10 years ago and provided them with a healthy Return on Investment (ROI), from there our track record and client-base grew exponentially. Most schools see a ROI of a typical E-Rate consulting investment of about at minimum 10X the cost of our consulting fees. In addition to large financial returns, our clients experience substantial functional benefits like expanded educational opportunity, improved planning processes and overall technology improvements.
